The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. Nature of Operations

Salazar Resources Limited (the "Company") was incorporated on July 23, 1987 under the provisions of the Company Act (British Columbia). The Company's common shares are listed and trade on the TSX Venture Exchange ("TSXV") under the symbol "SRL". The Company's principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia V6E 3V7 Canada.

The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of mineral properties located in Latin America. On the basis of information to date, the Company has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the exploration and evaluation assets is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete development and upon future profitable production. Exploration and evaluation assets represent costs incurred to date, less amounts depreciated and/or written off, and do not necessarily represent present or future values.

The Company's mineral properties are located in Ecuador and consequently the Company is subject to certain risks, including currency fluctuations and possible political or economic instability which may result in the impairment or loss of mining title or other mineral rights, and mineral exploration and mining activities may be affected in varying degrees by political stability and governmental regulations relating to the mining industry.

The Company's operations have been primarily funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. On April 19, 2017 the Company sold a 1% NSR on its Curipamba Project for US $2,750,000 cash proceeds. The Company has also entered into an agreement to farm-out a 75% interest in the Curipamba Project. See Note 4(i). As at September 30, 2017 the Company had working capital of $447,255 and an accumulated deficit of $25,295,235. Management considers that the Company has adequate resources to maintain its core operations and ongoing exploration programs on its existing exploration and evaluation assets for the next twelve months. However, the Company recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past there can be no assurance that it will be able to do so in the future.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, *Interim Financial Reporting* ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations, using accounting policies consistent with International Financial Reporting Standards ("IFRS"). The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2016, which have been prepared in accordance with IFRS as issued by the IASB and interpretations of the IFRS Interpretations Committee ("IFRIC"). The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's consolidated financial statements for the year ended December 31, 2016.

Basis of Measurement

The Company's condensed consolidated interim financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value.

4. Exploration and Evaluation Assets (continued)

Ecuador

The Company holds interests in the following properties in Ecuador:

(i) Curipamba Project

The Company owns a 100% interest in seven concessions located in the provinces of Bolivar and Los Rios, Ecuador.

On April 5, 2016 the Company entered into a letter agreement to sell a 2% net smelter royalty ("NSR") in its Curipamba Project for US $4,750,000. On July 18, 2016 the Company and RCF VI SRL LLC ("RCF SRL"), an affiliate of Resources Capital Fund VI L.P., entered into a royalty agreement whereby the Company sold to RCF SRL a 1% NSR for US $2,375,000. On April 19, 2017 the Company closed on the sale of the remaining 1% NSR for a further US $2,375,000.

On September 12, 2017 the Company entered into a definitive option agreement (the "Option") whereby Adventus Zinc Corporation ("Adventus") may earn a 75% interest in the Company's Curipamba Project by funding exploration and development expenditures of US $25,000,000 over the next five years. A feasibility study is expected to be completed within three years, after which Adventus is required to fund 100% of the development and construction expenditures to commercial production.

During the Option period Adventus will pay the Company a 10% management fee, with a prescribed minimum annual amount of US $350,000. In addition, Adventus will provide the Company with a US $250,000 per year advance payment until achievement of commercial production, to a maximum cumulative total of US $1,500,000. The advance is to be paid preferentially to Adventus upon start of commercial production.

On September 29, 2017 the Company received TSXV approval and, on October 13, 2017, Adventus and the Company closed on the Option.

(ii) Ruminahui Project

The Company owns a 100% interest in two concessions located in the province of Pichincha, Ecuador. In prior years the Company has only made partial payments on these concessions. The Company can make applications to reduce the acreage of its concession holdings but, to date, no formal request has been made. In addition, no payment requests have been made by the Ecuador authorities for the unpaid amounts and the concessions have not been cancelled.

One concession, the Moncayo concession, is being acquired pursuant to an option agreement. As at September 30, 2017 there remains US $50,000 of option payments outstanding.

During fiscal 2015 the Company recorded an impairment charge of $610,893 to reduce the carrying value of the Ruminahui Project to a nominal amount of $1. Accordingly all subsequent costs incurred on the Ruminahui Project are expensed as general exploration costs.

(iii) Santiago Concession

The Company holds a 100% interest in a concession (the "Santiago Concession") located in the province of Loja, Ecuador. The Santiago Concession is subject to a 1.5% net smelter return royalty (the "NSR"). The Company may re-purchase half of the NSR upon payment of US $850,000.

(Unaudited - Expressed in Canadian Dollars)

4. Exploration and Evaluation Assets (continued)

(iv) Mendez Project

The Company owns a 100% interest in two concessions in the province of Morona Santiago, Ecuador. In prior years the Company has only made partial payments on these concessions. During fiscal 2015 the Company recorded an impairment charge of $720,969 to reduce the carrying value of the Mendez Project to a nominal amount of $1. Accordingly all subsequent costs incurred on the Mendez Project are expensed as general exploration costs.

5. Share Capital

(a) *Authorized Share Capital*

The Company's authorized share capital consisted of an unlimited number of common shares without par value. All issued common shares are fully paid.

(b) *Equity Financings*

No financings were completed during the nine months ended September 30, 2017.

During fiscal 2016 the Company:

(i) completed a non-brokered private placement financing of 22,293,398 units, at a price of $0.06 per unit for $1,337,604. Each unit consisted of one common share of the Company and a one-half of one share purchase warrant. Each whole warrant entitles the holder to purchase one additional common share of the Company at a price of $0.12 per share, expiring April 27, 2018. RCF VI purchased $1,033,774 of the private placement;

(ii) negotiated debt settlements with both insiders and non-insiders of the Company in regards to accrued and unpaid compensation pursuant to which $332,122 of debt was forgiven and $336,008 was settled by the issuance of 5,600,132 common shares of the Company at a price of $0.06 per share; and

(iii) issued a total of 22,762,333 units of the Company, on the same terms as the private placement units, in settlement of the advances, Promissory Notes and accrued interest payable.

The Company incurred $32,095 of share issue costs relating to the private placement and debt settlements.

(c) *Warrants*

A summary of the number of common shares reserved pursuant to the Company's outstanding warrants at September 30, 2017 and 2016 and the changes for the six months ended on those dates is as follows:

	2017		2016

4,242,423	0.12	July 18, 2018
22,527,863		

(d) *Share Option Plan*

The Company has established a rolling share option plan (the "Plan"), in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the options is set at the Company's closing share price on the day before the grant date, less allowable discounts in accordance with the policies of the TSXV. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of five years.

No share options were granted during the nine months ended September 30, 2017 and 2016.

A summary of the Company's share options at September 30, 2017 and 2016 and the changes for the nine months ended on those dates, is as follows:

7. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following five categories: fair value through profit or loss ("FVTPL"); held-to-maturity investments; loans and receivables; available-for-sale and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	September 30, 2017 $	December 31, 2016 $
Cash	FVTPL	812,366	1,640,610
Amounts receivable	Loans and receivables	9,506	9,421
Investment	Available-for-sale	3,915	4,133
Accounts payable and accrued liabilities	Other financial liabilities	(450,143)	(257,239)

7. Financial Instruments and Risk Management (continued)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable, accounts payable and accrued liabilities, approximate their fair value due to their short-term nature. The Company's cash and investment under the fair value hierarchy are measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash and amounts receivable is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Contractual Maturity Analysis at September 30, 2017				
	Less than 3 Months $	**3 - 12 Months $**	**1 - 5 Years $**	**Over 5 Years $**	**Total $**
Cash	812,366	-	-	-	812,366
Amounts receivable	9,506	-	-	-	9,506

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company's significant subsidiary is located in Ecuador which has adopted the US Dollar as its currency. The Company also maintains cash deposits in US Dollars with its Canadian bank. As such, the fluctuation of the Canadian Dollar in relation to the US Dollar will have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks. At September 30, 2017, 1 Canadian Dollar was equal to 0.80 US Dollar.

Balances are as follows:

	US $	CDN $ Equivalent
Cash	613,999	767,499
Amounts receivable	4,082	5,297
Accounts payable and accrued liabilities	(140,296)	(175,370)
	477,785	597,426

Based on the net exposures as of September 30, 2017 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the US Dollar would result in the Company's net income being approximately $58,000 higher (or lower).

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital and cash. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
