FORWARD-LOOKING INFORMATION

Certain of the information and statements contained in this presentation constitute “forward-looking information” within the meaning of applicable securities laws. Forward-looking information is often, but not always, identified by the use of words such as: “believe”, “anticipate”, “estimate” and similar expressions, or are those, which, by their nature, refer to future events. Forward-looking information in this presentation includes, without limitation, statements regarding the Curipamba project and Salazar’s other exploration projects; the anticipated timing for completion of future milestones, such as the completion of studies, optimization, EIA work and a feasibility study for the Curipamba project, the completion of exploration programs, the obtaining of permits, and the anticipated commencement of construction and production; the expectation that Adventus Mining will complete its earn-in at Curipamba and that the Company will continue to receive advanced payments and management fees in connection therewith; regulatory processes and permitting; estimates of copper or other minerals grades; information from the technical report entitled “Technical Report on the Preliminary Economic Assessment for the Curipamba Project – El Domo Deposit, Central Ecuador” dated June 14, 2019 with an effective date of May 2, 2019 (the “Technical Report”); and other statements that are not historical facts. Information concerning mineral resource estimates and the preliminary economic analysis contained in the Technical Report are forward-looking information in that they reflect a prediction of the mineralization that would be encountered, and the results of mining it, if a mineral deposit were developed and mined. Although the Company believes that such forward-looking information as set out in this presentation are reasonable, it can give no assurance that any expectations and estimates contained in the forward-looking information will prove to be correct. The Company cautions investors that any forward-looking information provided by the Company is not a guarantee of future results or performance, and that actual results may differ materially from those in forward-looking information as a result of various factors, including, but not limited to, the state of the financial markets for the Company’s equity securities; the state of the market for copper or other minerals that may be produced generally; significant increases in cost of any of the machinery, equipment or supplies required to develop and operate a mine; a significant change in the availability or cost of the labour force required to operate a mine; a significant increase in the cost of transportation for the Company’s products; variations in the nature, quality and quantity of any mineral deposits that may be located; the Company’s ability to obtain any necessary permits, consents or authorizations required for its activities; the Company’s ability to raise the necessary capital or to be fully able to implement its business strategies; the evolving legal and political policies of Ecuador; industrial or environmental accidents; availability and cost of insurance; currency fluctuations; and other risks and uncertainties associated with the exploration and development of mineral properties. The reader is referred to the Company’s public filings for a more complete discussion of such risk factors and their potential effects which may be accessed through the Company’s profile on SEDAR at www.sedar.com. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information.

SCIENTIFIC AND TECHNICAL MINING DISCLOSURE

The following independent qualified persons (“IQPs”) co-authored the Technical Report. These IQPs have approved the information that pertains to the sections of the Technical Report that they are responsible for:

Geology: David Ross, P.Geo., RPA

Metallurgy and Processing: Avakash Patel, P.Eng., RPA

Mineral Resource estimate: Dorota El Rassi, P.Eng., RPA

Mining: Hugo Miranda, P.Eng., RPA

Infrastructure and Economic Evaluation:
Torben Jensen, P.Eng., RPA

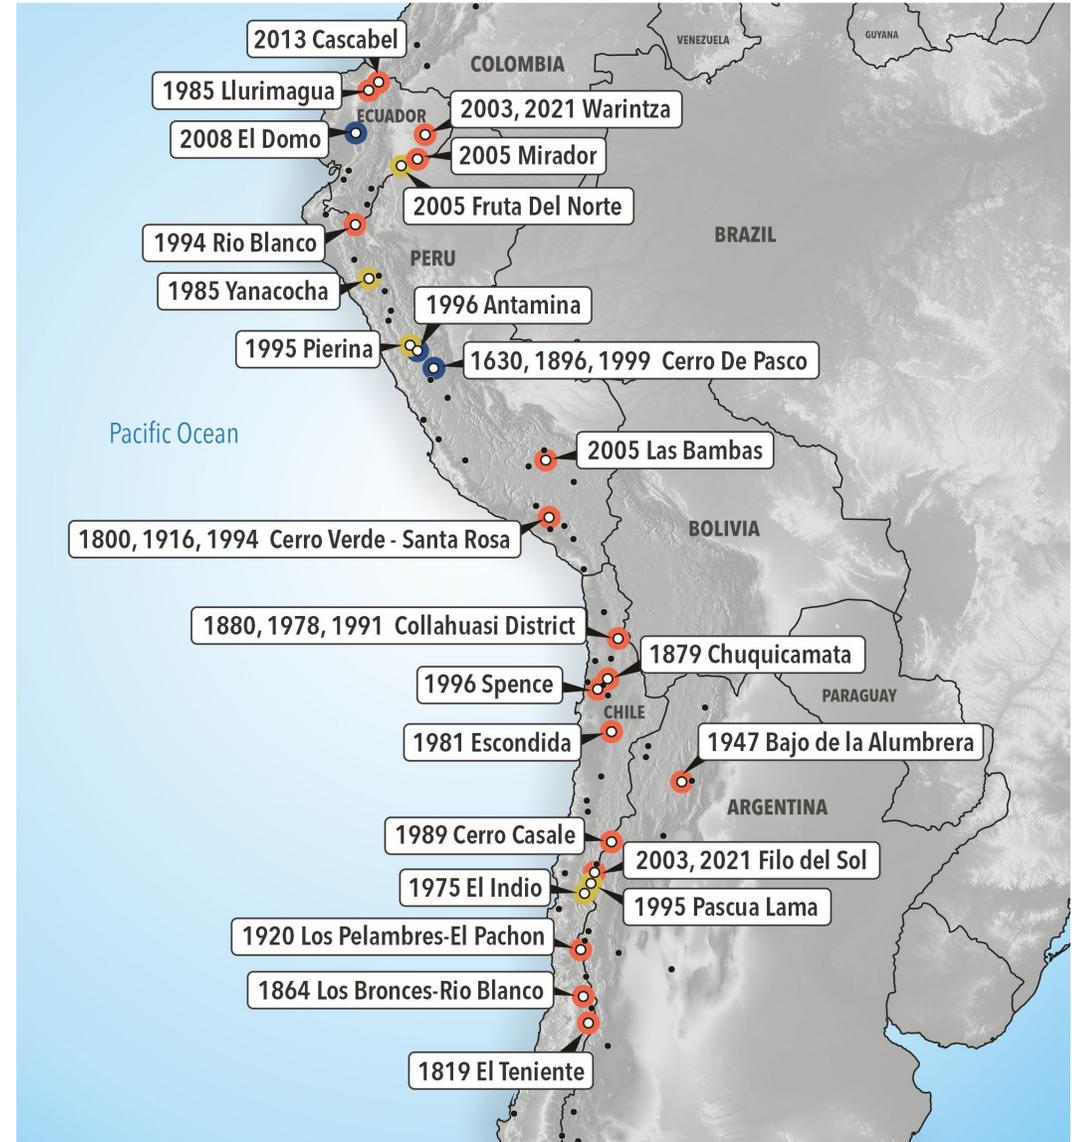

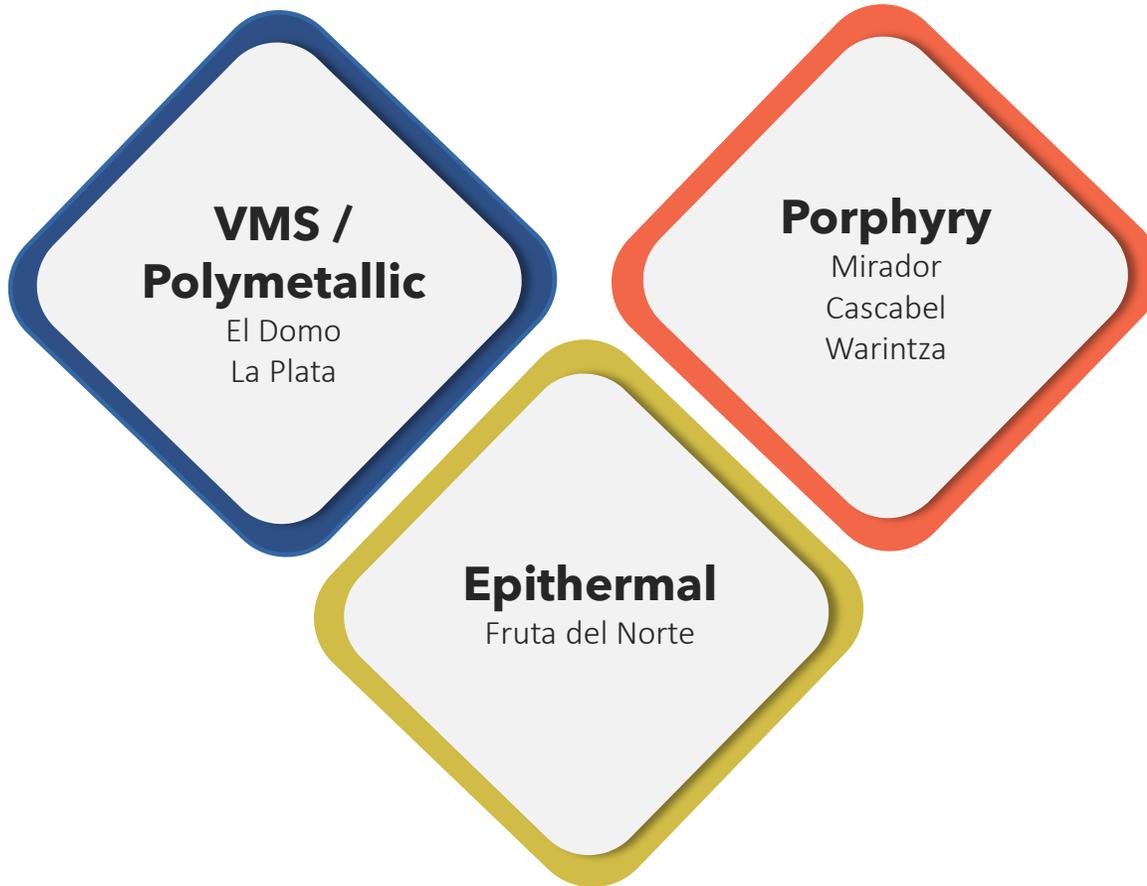

Environmental & Community: Ken Embree, P.Eng., Knight Piésold

Each of the individuals above are independent qualified persons for the purposes of National Instrument 43-101. All scientific and technical information in respect of El Domo and or the PEA is based on information prepared by or under the supervision of those individuals. The Mineral Resource estimate in this presentation has been classified in accordance with CIM Definition Standards - For Mineral Resources and Mineral Reserves (May 14, 2014).

Kieran Downes, P.Geo., a qualified person as defined by National Instrument 43-101 and a consulting geologist for Salazar, is responsible for other scientific and technical disclosure contained in this presentation.

45% OF PRIMARY COPPER SUPPLY* IS FROM CHILE AND PERU

ECUADOR IS THE NEW FRONTIER FOR SPECTACULAR DEPOSIT DISCOVERIES

* 2019 USGS estimates

VMS* DEPOSITS OCCUR IN CLUSTERS

FIRST OREBODY FOUND AT CURIPAMBA - EL DOMO

VMS deposits are found worldwide, and often form in clusters, following the tectonic plate boundaries in areas of ancient underwater volcanic activity

Canada
Flin Flon: 1920 to 2021
Bathurst: 1953 to 2013
Noranda: 1922 to 1976
Many high-grade
5-20 Mt orebodies

Iberian Pyrite Belt
~90 VMS deposits
Several >100 Mt orebodies
Production from Romans to
present day

* Volcanogenic Massive Sulphide

ALL EYES ON ECUADOR:

RELATIVELY UNDEREXPLORED, GEOLOGICALLY FERTILE, YIELDING DISCOVERIES

- USD currency: Foreign Direct Investment / Export Earnings vital
- President Lasso sees mining industry as strategically important
- Executive Decree #151 sets strong development agenda
